2. How to use

2-1. How to connect

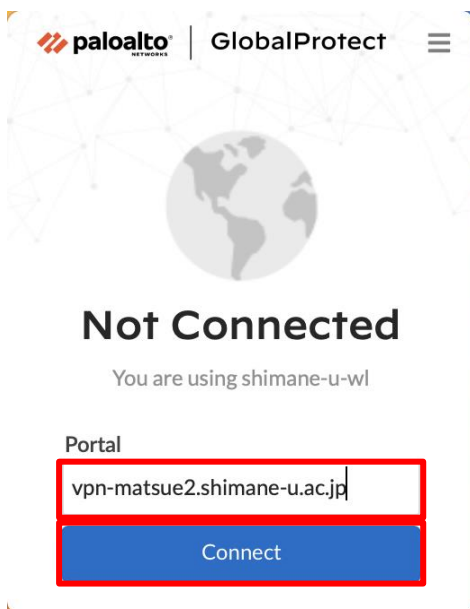

2-1-1. Click the 「globe」 icon on the status bar in the top right to start Global Protect.

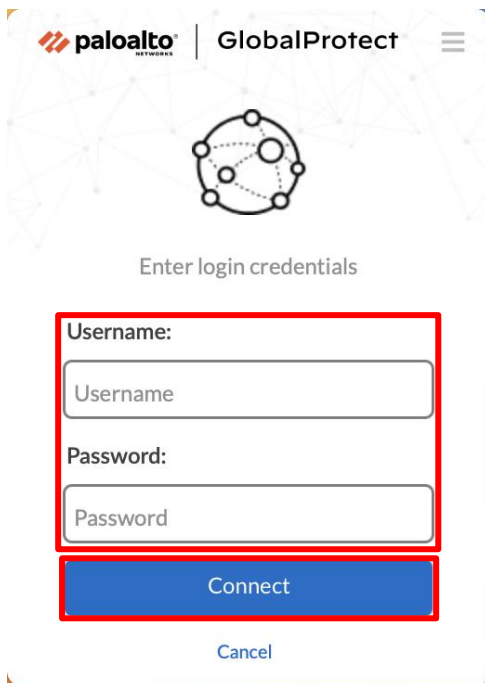

2-1-2. Enter click 「Get Started」 .

2-1-3. Enter 「vpn-matsue2.shimane-u.ac.jp」 and click 「Connect」 .

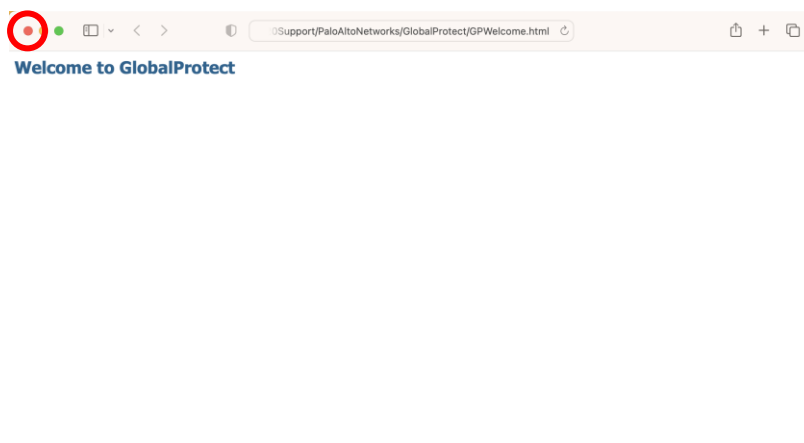

2-1-4. Enter your user ID and password of the Shimane University integrated authentication system in the Username and Password field, respectively. Then click 「Connect」 .
(You may not be able to enter it for the first time. In that case, convert English ⇔ Japanese several times, or copy and paste it that entered in a memo.)

The screenshot shows the Palo Alto Networks GlobalProtect login interface. At the top left is the Palo Alto Networks logo, followed by the text 'GlobalProtect' and a hamburger menu icon. Below this is a network diagram icon and the text 'Enter login credentials'. There are two input fields: 'Username:' and 'Password:'. Below these fields is a blue 'Connect' button and a 'Cancel' link. A red box highlights the Username and Password fields and the Connect button.

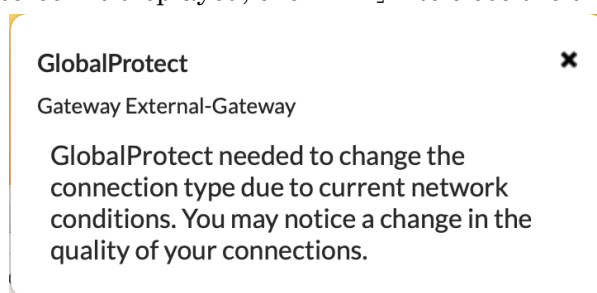

2-1-5 If you see 「Welcome to Global Protect」 , click 「×」 to close the dialog.

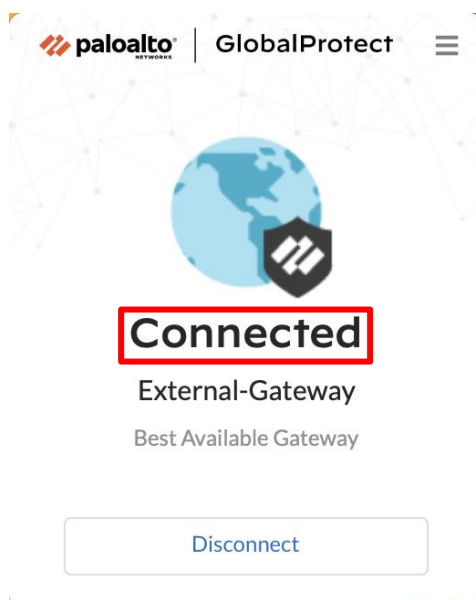

2-1-6. When the following screen is displayed, click 「OK」 .

2-1-7. When the following screen is displayed, click 「×」 to close the dialog.

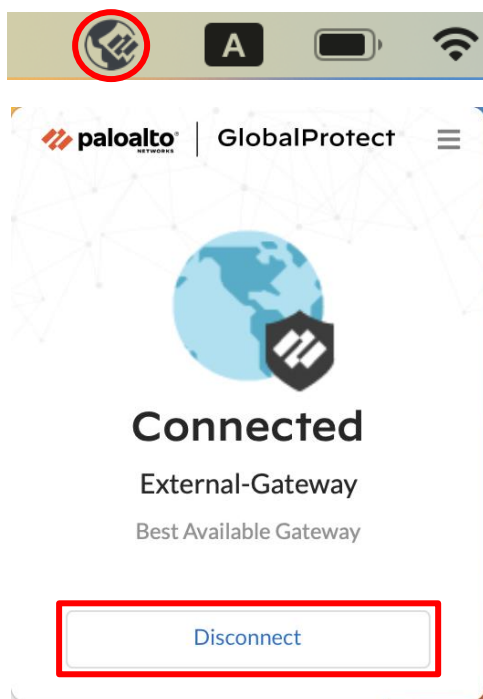

2-1-8. When you see the following screen, your computer is securely connected. If you cannot see it, Try 2-1-1 again.

2-2. How to disconnect

2-2-1. Click the 「globe」 icon on the status bar in the top right to start Global Protect.

Click 「Disconnect」 .

2-2-2. When you see the following screen, your computer is disconnected from Global Protect.
