

How to uninstall Global Protect(Windows11)

1. Make sure that Global Protect is disconnected. Otherwise, disconnect it first referring to the step 2-2-1 to 2-2-3 in the 「How to install and use Global Protect (Windows11)」 document.
2. Click 「Start」 menu→ 「Settings」 (Gear icon) → 「Apps」 → 「Installed apps」 .

3. Find 「Global Protect」 in the list of apps and click 「Uninstall」 .

4. You are prompted to uninstall Global Protect. If yes, Click 「Uninstall」 .
